Product Designer

Many forms of unique design.

Matching style

Armchairs from the Fan collection both highlight modern character of an office and add a lighter feel to the entire room. Inviting shell form of the chair encourages people to open up and exchange creative ideas. With optional wooden legs, Fan armchairs bring to mind Scandinavian design.

From the left: 10Z, 10F, 10HC, 10V, 10R, 20V, 10H, 10HW.

Distinct and versatile

Unmistakable lines and subtle elegance of Fan armchairs and sofas work perfectly in offices and less formal spaces alike. For enhanced comfort, the shell is made of soft profiled foam.

The beauty of contrast

With contrasting stitching, the light form of Fan furniture comes to the front. This feature also adds a modern touch to the collection.

Office functionality

Not only do Fan armchairs have unique design – they also come with functions and mechanisms one would expect of office chairs.

Memory return

Both the 4-star (F) and the round (R) base are equipped with shock absorbers with a memory-return function. It enables the chair to automatically return to the basic position when not in use.

Economic Mechanism

Swivel chair with Economic (E) mechanism for adjusting the height of the seat.

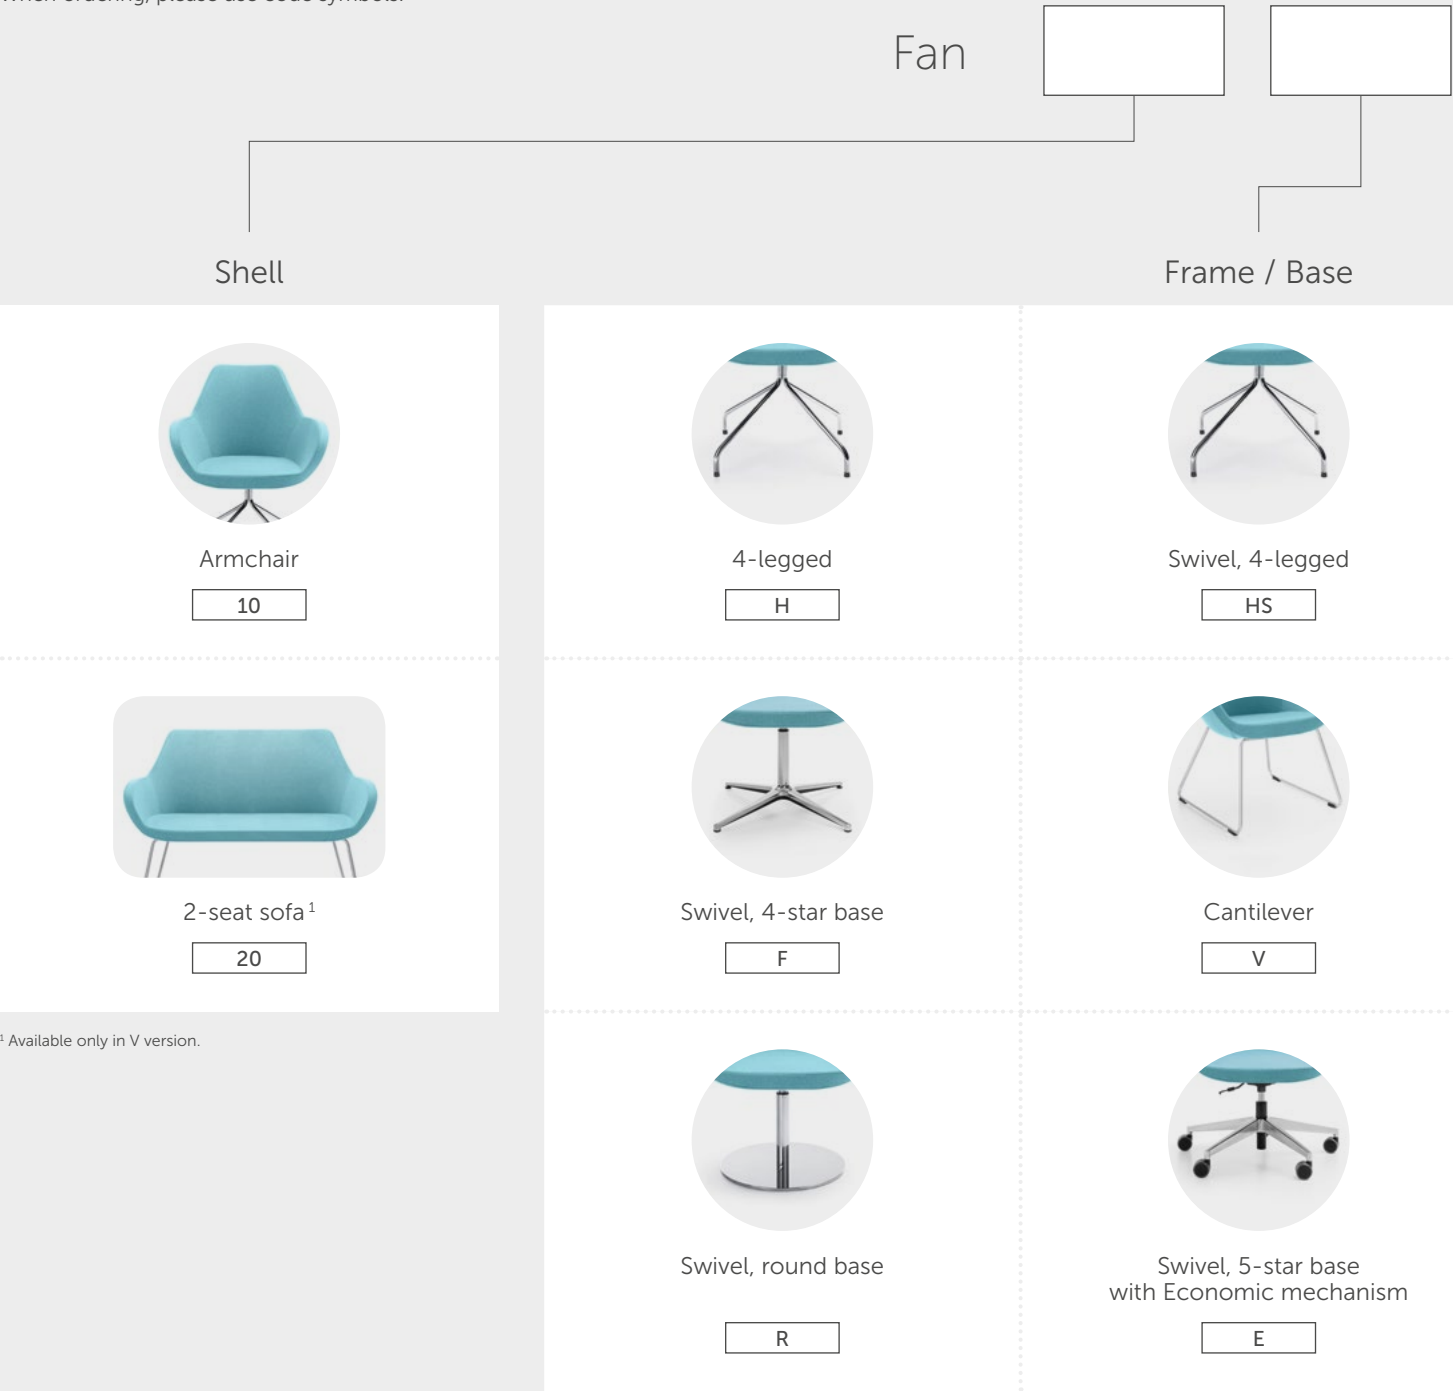

Rocker Mechanism

Adjusting the height and the angle of inclination of the seat, with the possibility of blocking in upright position. Tilting the shell forwards eliminates pressure on thighs.

Measurements

The measurements are approximate and can differ depending on the product configuration.
Measuring methodology is available at this link: www.profim.eu/Measuring_methodology.pdf

* Seat height is measured according to PN EN 16139 norm (with seat burden).

Profim and the Environment

In our operation we follow the sustainability principle. We operate in a responsible manner for the benefit of our customers, employees, suppliers, and the local community, but we always respect the environment.

In order to achieve our goals, we have implemented Environmental Management System based on the ISO 14001 standard, which allows for a comprehensive approach to ecology. We take into consideration and evaluate the way Fan products affect the environment during their entire life cycle.
